\$69.95

Section 2 – E- Learning

Nature Care College is On-Line

Moodle is an open source Learning Management System (LMS) designed to support e-learning. The word “Moodle” is an acronym for Modular Object Oriented Dynamic Learning Environment.

Pedagogy

Moodle supports active learning rather than just passive learning and improves student engagement by allowing students to be co-contributors and knowledge builders.

Moodle was chosen because of its ease of use, flexibility and adaptability to meet the needs of learning and teaching that are important for Nature Care College.

How will Moodle help me?

Moodle will give you a simple clear view of learning activities and resources and enable you to access information whenever you require. Through this portal you will be able to receive all your learning materials and resources, submit assignments, take quizzes and tests online, do activities and see all your grades. It will also provide you with an enriched on-line class room learning experience for both on campus and distance learning students.

There will be a forum, where you can communicate with your trainer and classmates on aspects of the course and material.

The Moodle portal will be accessed via the college website with each student using her/his email address as their log-in and password. Passwords can be changed/re-set on line.

What do I need to know before using Moodle?

As an NCC student you will need to have a Windows or Mac computer with access to the internet. Moodle works well with different operating systems, but the latest version of Windows or Mac OSX are recommended.

Use a broadband connection (256 Kbit/sec or faster) through USB wireless modem, ADSL, T1/T2, fibre optic or cable.

Dial-up access will be significantly slower, and we do not recommend it for using Moodle.

The recommended browsers are:

- Google Chrome 22 or later (recommended for optimal compatibility)

Note that add-ons and toolbars can affect any browser’s performance.

The following will need to be enabled

- Cookies
- Popups (in both internet browser and security software)
- Javascript

Also it is recommended that you are using the latest version of Adobe Flash Player and Adobe Acrobat Reader.

You need to have some basic web browsing and computer skills, including how to attach, upload and download a file.

It really does not take a great deal of skill or computer knowledge to use Moodle and we will supply you with an instruction manual and links to YouTube support media.

Since Moodle is an online learning management system you will need to be online to access the information. Of course there will be activities that you can do offline, so you will not be in front of the computer for the whole time.
