

Psychology of Food

Summary

This course will enable you to understand the basic concepts of how different foods affect our psycho-physiology – our moods, our behaviour, our choices in life. Understand how cravings act on the brain. Begin to understand the vast arena of our gut bacteria. Learn which foods make us happy and why. Enjoy gaining practical and useful knowledge in a light-hearted fun environment.

Duration

12 hours

(6 contact hours & 6 hours self-directed learning)

Hours are inclusive of all supervised and prescribed activities throughout the duration of this subject. These may include lectures, on-line tasks, forums, assessments, prescribed reading, research, assignments and activities.

About The Trainer

Fiona Banovic is a clinical nutritionist based in Sydney. She is passionate about enjoying great food and a sunny lifestyle, all in the name of good health. But she is also realistic about the pressures of an increasingly fast city life so flexibility is a big factor in her advice.

She holds a Bachelor Degree in Health Science, a Diploma of Nutrition, and a Bachelor Degree in Commerce. She is a Professional Member of the ATMS and has been in professional practice since 2002.

Learning objectives:

1. Articulate the connection between gut-health and overall health
2. Be familiar with current research into connection between gut microbiome and maintaining human health
3. Identify key causes of food addiction
4. Research: treating behavioural/mood disorders through nutritional support
5. Understand how neurotransmitters can hijack your logical thinking

Assessment

Our assessments are designed to make your learning experience both engaging and inspiring. They also help consolidate what you've learned. Assessment quizzes are open book and held online.

This subject is assessed by:

- one on-line quiz
